Building my first dental office was a very exciting and daunting task. I was both nervous and scared. With the help of Artin and his team of contractors, designers and crews I was in good hands. They stuck to the time frame, budget and everything went very smoothly. Now I have a beautiful, state of the art, modern dental office to call my own! It turned out better than I imagined.

As things have gotten up and running, a few small hiccups have arisen, which I would have expected. Artin has addressed all of these things in a very professional and generous manner. I feel he wants his clients to succeed and sets you off on the right foot. I would definitely recommend Artin and his team to other dental professionals. Artin, especially, is great to work with.
